Source of all data is FactSet.

Returns shown are total returns. Total return, when measuring performance, is the actual rate of return of an investment or a pool of investments over a given evaluation period. Total return includes interest, capital gains, dividends and distributions realized over a given period of time. Returns are annualized for periods greater than one year.

PE NTM is abbreviated for the next twelve months and is forecasted using FactSet data measures. This is not intended to reflect what will happen.

PB & DY (Div Yield) LTM is abbreviated for the last twelve months or trailing 1 year measures.

All fixed income, equity, commodity, key rate and currency index levels, yields, and periodic total returns as of the date shown.

MSCI Index returns reflect Net of Dividend Tax Withholding. A withholding tax related to a dividend is a tax on the income of the shareholder withheld by the company when the dividend is paid to a shareholder. The withholding tax rate depends on the tax status of the shareholder. MSCI uses the maximum withholding tax rate applicable to institutional investors in calculating MSCI net dividends.
